Dear Examiner Nghiem:

In advance of our interview in the subject application, scheduled for tomorrow (13/4/05), I propose the following agenda:

1. § 112 rejection of Claim 49. "An" attribute is required.
2. Clarification that the Katzir reference discloses multiplying the pulse rate so that it is at least as fast as the data rate, and therefore does not meet the limitation of "a data rate that is higher than a pulse repetition rate of the pulsed light".

I would be grateful if you confirm receipt by return email to mich-f@orbotech.com.

I look forward to meeting you tomorrow at 1:30 p.m.
